EDUCATION

2022–2026
PhD in Finance
University of Luxembourg

2018–2020
MSc in Quantitative Finance and Insurance
University of Turin

Awarded 2020
Master of Research in Economics
Collegio Carlo Alberto

Awarded 2018
Bachelor in Economics
University of Turin

CORE EXPERTISE

Modelling :	Statistics, machine learning, forecasting
Data :	Python, R, MATLAB, Stata, SQL
Delivery :	Research, data quality, teaching

LANGUAGES

Italian	Native
English	C1/C2
French	C1/C2
Luxembourgish	B1

DEVELOPMENT

27 October 2026 – April 2027 (expected)
Applied Data & AI Academy
WeSTEM+ | In progress

PROFILE

Data scientist based in Luxembourg, with a PhD in Finance completed in April 2026. Interested in machine learning and data science, with experience turning complex data into statistical models, forecasts and clear analytical results.

EXPERIENCE

Doctoral Researcher in Finance
University of Luxembourg, Luxembourg

February 2022 – April 2026

- Developed statistical and machine-learning models for empirical finance and long-run economic forecasting.
- Built a Kalman-filter-based approach to reconstruct missing GDP observations from historical country data.
- Co-authored two journal articles; responsible for four university courses, including planning, teaching and assessment.

Liquidity Stress Testing Analyst
DWS Investments S.A., Luxembourg

February – December 2021

- Contributed to liquidity-stress-testing model development for money market funds.
- Collaborated with IT to translate analytical methodology into production use within four months.
- Worked with Python, R, MATLAB and Aladdin to analyse and communicate quantitative results.

Quantitative Finance and Compliance Specialist
Accenture, Turin, Italy

July – October 2019

- Analysed bank-account models for an Intesa Sanpaolo project concerning the Payment Accounts Directive.
- Integrated source files into an analytical dataset using SQL and Python.
- Applied statistical modelling and communicated findings to management.

Data Analyst Intern
London Mutual Credit Union, London, United Kingdom

May – September 2017

- Built an OCR workflow to extract document fields into a unified analytical dataset.
- Processed more than 80,000 documents in approximately six weeks, principally using MATLAB.
- Developed credit-scorecard analysis and presented the workflow and results to management.
